

# Enumeration

# Course Topic Overview

- + Servers and Services
- + SMB
- + FTP
- + SSH
- + HTTP
- + SQL

- + Basic network concepts
- + Basic Linux familiarity
- + Footprinting and Scanning

## Prerequisites

## Learning Objectives:

- Students will know purpose of service enumeration.
- Students will identify common services and protocols.
- Students will perform service enumeration on common services and protocols.
- Students will understand process for enumerating unfamiliar protocols and services.

# Servers and Services

What are they?

## Servers and Services

Why are they important?

What do they mean to  
cyber security?

# What is a server?

# What is a server?

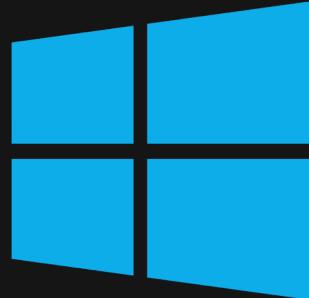

# What is a server?

# What is a server?

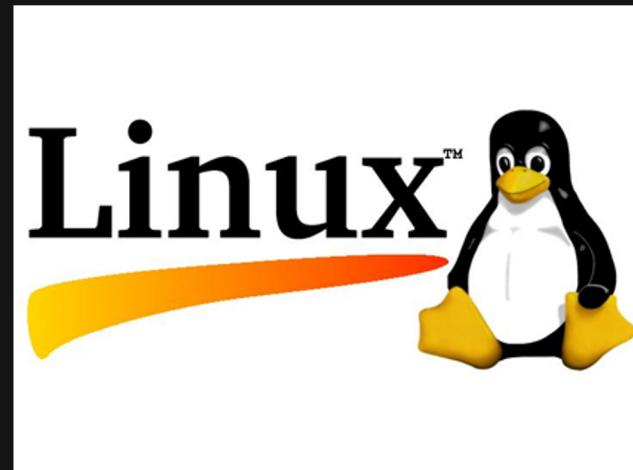

What is a server?

# Windows

macOS  
Server

Why are they important?

# Openings

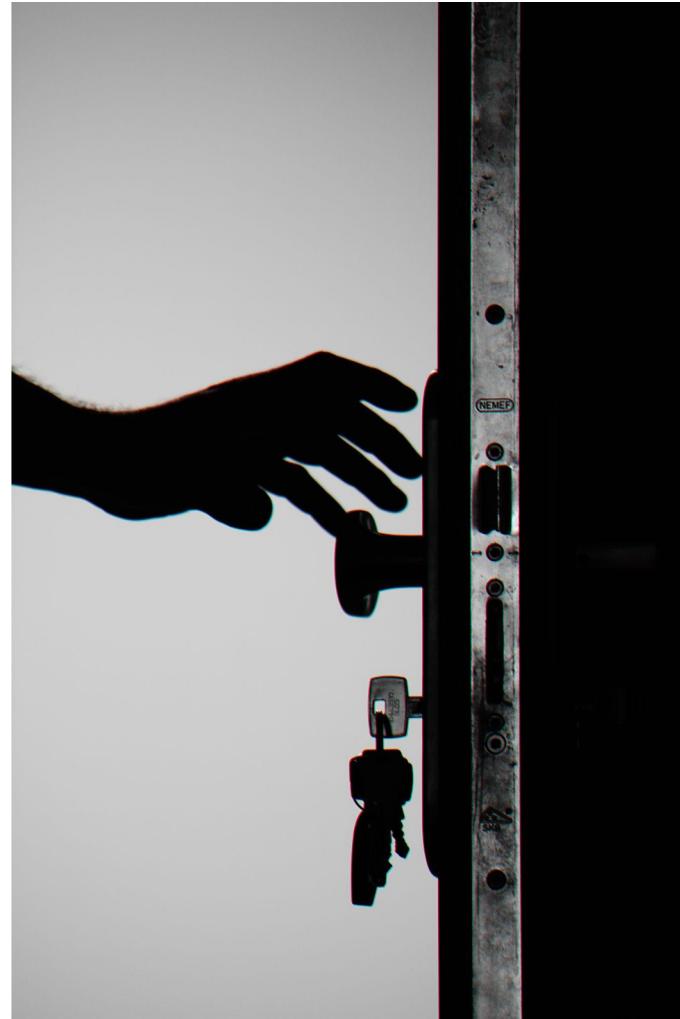

## Bugs and Features

I'm in!

Let's go try it out!

# SMB

SMB: Windows Discover and Mount

# SMB

SMB: Nmap Scripts

# SMB

SMB: SMBMap

# SMB

SMB: Dictionary Attack

# FTP

Dictionary Attack

# Enumeration

Trailer

# HTTP

Apache

# MSSQL

Metasploit

# Enumeration

## **Learning Objectives:**

- Students will know purpose of service enumeration.
- Students will identify common services and protocols.
- Students will perform service enumeration on common services and protocols.
- Students will understand process for enumerating unfamiliar protocols and services.
